

EVERYDAY MATH

Level 1 Training
1 Hour Online Training

This session highlights how math is interwoven in our everyday lives and can be effectively integrated into any classroom. The training will assist educators in developing a daily schedule that naturally includes math, showing how mathematical concepts can be a fluid, engaging part of regular daily activities. This approach aims to build a foundational understanding and appreciation of math in young children, emphasizing that math is all around us. This session will help teachers SEE math in every setting of their classroom and help them intentionally develop child's mathematical skills.

**THURSDAY,
MARCH 13TH**

7:00 - 8:00 PM CST

Online - Zoom

*Separate sessions for Center &
Family Child Care Staff!*
