

Elevating Teacher-Child Interactions Through Meaningful Language

Level 1 Online
1-Hour Training

This comprehensive training is designed to empower educators with a deeper understanding of language modeling and the critical role of high-quality feedback in fostering effective learning environments. Through a blend of theory and practice, participants will explore how these principles come to life across varied classroom settings and age groups. The session will provide hands-on experiences with proven strategies for enhancing children's language development, including: Serve and Return interactions, Self-talk techniques, Parallel talk methods, Incorporating open-ended questions to stimulate critical thinking. Educators will leave equipped with practical tools and actionable insights to apply these strategies, tailoring them to meet the unique needs of their students.

Thursday, May 15th from 7:00-8:00pm
Online-Zoom
